🔗 LeetCode

Education

Indian Institute of Information Technology, Vadodara

Dec 2022 – 2026

B.Tech in Computer Science and Engineering

Experience

devx AI labs

January 2026 – Present

Software Development Engineer Intern

- Architected a **scalable component library** by migrating hardcoded layouts to **reusable, token-driven components** using design system principles, reducing UI duplication by **40%** and accelerating feature development velocity.
- Designed **reusable content models** using **Strapi (Headless CMS)** and integrated them via APIs to enable **dynamic, CMS-driven UI rendering**.
- Improved frontend performance using **code-splitting** and ensuring smoother rendering for data-heavy pages.

Pistalix Software Solutions

May 2025 – Jul 2025

Project Management & Frontend Developer Intern

Surat, Gujarat

- Led **client requirement gathering** and translated **business requirements** into technical solutions for an AR-based jewelry visualization platform.
- Designed and developed an interactive **3D AR Ring Viewer** using **React** and **Three.js**, focusing on realistic rendering and seamless user experience.
- Collaborated with **clients and stakeholders** through iterative feedback cycles to refine features, align deliverables, and improve overall product usability.
- Built **reusable frontend components** and optimized application performance through **model compression**, rendering improvements, and lighting optimization.

Projects

AI-Powered Interview Assistant | Gemini API, React, TypeScript 🔄

- Built a **React 18 + TypeScript** web application simulating an end-to-end interview workflow with timed questions, scoring logic, and structured evaluation.
- Implemented **resume upload and parsing (PDF/DOCX)** to auto-generate candidate profiles and streamline interview setup.
- Integrated **Google DeepMind Gemini API** to dynamically generate interview questions, evaluate responses, and produce AI-driven candidate summaries.

Loan Recommendation Platform | Gemini API, React, TypeScript, REST APIs 🔄

- Built a platform that helps users discover **suitable loan options** based on their financial inputs and preferences.
- Developed responsive UI workflows using **React** with reusable components for form handling and user interaction.
- Integrated **REST APIs** to handle user data flow and support loan recommendation logic.
- Implemented an **AI-powered chatbot** to provide **Q&A support** and help users understand recommended loan options.

TECHNICAL SKILLS

Languages: C/C++, TypeScript, SQL

Frontend Technologies: React.js, HTML, CSS, Three.js, Responsive Design

Backend & APIs: REST APIs, Strapi (Headless CMS), API Integration

Tools & Platforms: Git, GitHub, Vercel, VS Code, Postman

Core Fundamentals: Object-Oriented Programming (OOP), DBMS, Operating Systems

Soft Skills: Teamwork, Communication, Leadership, Problem Solving, Stakeholder Collaboration

Leadership & Achievements

- **Logistics Lead, MLSA IIIT Vadodara** — Coordinated logistics and operations for campus technical events and workshops.
- **Convener / Co-Convener, Technical Fest** — Managed planning and execution of Valorant esports events and team coordination.
